Workflow Central Use Case
Education Sector
Summarize and Convert to Audio

xerox™

Detailed Use Case
Education Sector – Summarize and convert text into shareable audio files.

The Challenge

- Paula is often asked to help Special Education students navigate grade level text. For students with learning disabilities, getting through assigned reading can be an exhausting process as they wrestle with each word, grasping for meaning.

The Solution

- When a reading assignment is particularly lengthy, Paula can use Xerox Workflow Central to summarize the whole text, then convert it to audio. The teacher can then email or send the audio file via the Learning Management System (LMS).

The Benefits

- Students start a reading assignment on their own. As fatigue and frustration set in, they're able to listen to the content in an audio file. Now, students stay engaged, up-to-speed and able to meet their own learning needs.

Summarize + Convert to Audio
